Kendra,

This issue is in process. The Department intends to comply with State law in terms of the 60 day notification to the Legislature before the Governor submits recommendations regarding PM 2.5 non-attainment to EPA.

Larry - Thanks for the update.

Al and Kevin - Would you let me know what the current timeline is for submittal to the Legislature and EPA? I assume your submittal to EPA would be at least 60 days after the submittal to the Legislature. Thanks.

Kendra, I believe that the Secretary and the Governor's office have been briefed on the issue. I wasn't privy to the briefings and I don't have any additional information on the status of the submittal. Al Shea may be able to shed some light on the issue.

Larry,
Thank you for the update.. Would you update me on the status of the PM2.5 designation submittal in September after you brief the new Secretary?

Kendra,
Our work on the PM2.5 designation is temporarily on hold pending a briefing for the new Secretary. This may cause us to miss the December 18 deadline for submitting the Governor's recommendation on designations to EPA. However, we don't expect any significant consequence with missing the deadline by a few weeks. Al or Kevin may be able to provide you with additional detail.

Larry,

Would you update me on the status of DNR's work and timeline for submittal of a recommendation to EPA this fall for potential PM2.5 nonattainment areas in the state? I recall that the state recommendation will need to be submitted to EPA in approximately November, and 60 days before that would require submittal to the legislative environmental committees in September. But I don't recall the specifics of the status of the Air Management program's work, or the current timeline.

Are there any descriptive updates on the current timeline on the DNR website? I couldn't find anything from the past several months, but know I might have missed something.

Thanks for updating me.
